| Deleting an item | Deletion of item. Updation of list | Item deleted. Display updated by page refresh |

TEST -2:

| Input | Expected output | Actual Output |
|--|----------------------------|---|
| Add new item with all data fields but without selecting lost/found | Failure to add new courier | Failure to add new courier. Display does not show the added courier |

Acceptance Testing

1. Test Case: Add Notice

Objective: To verify that the "add notice" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.
- The user wants to make an announcement.
- The user must have the role as **admin**.

Steps:

1. Navigate to the notices page using the sidebar.
2. Click on the "Add Notice" button.

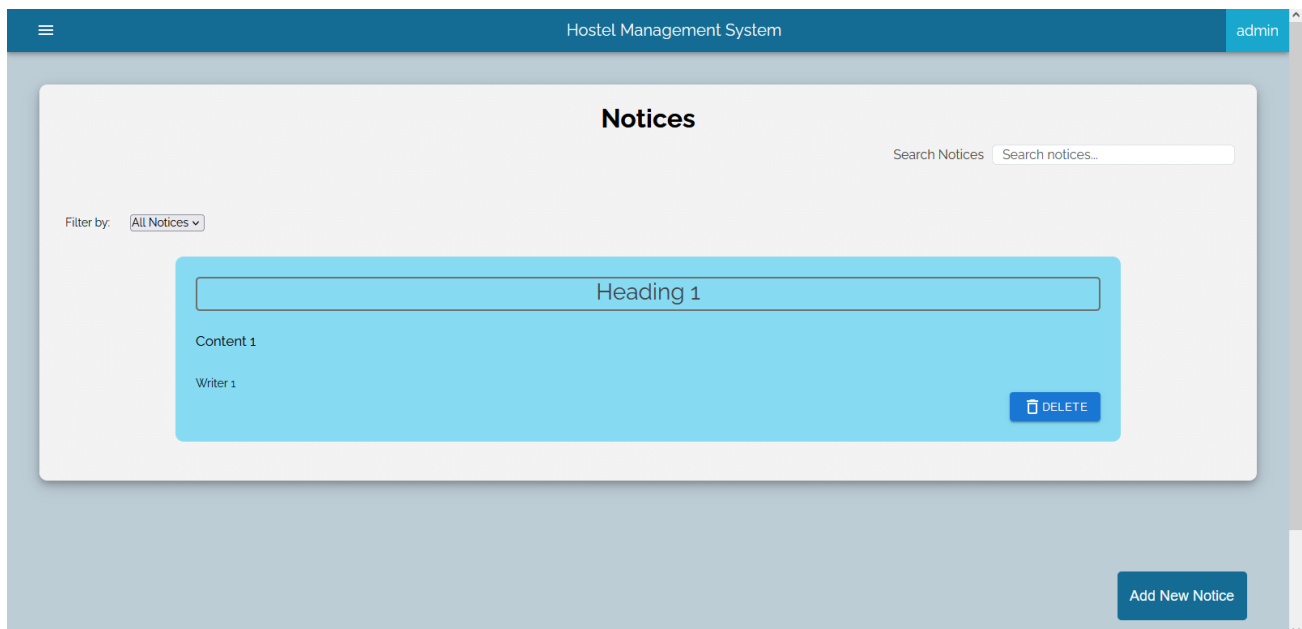

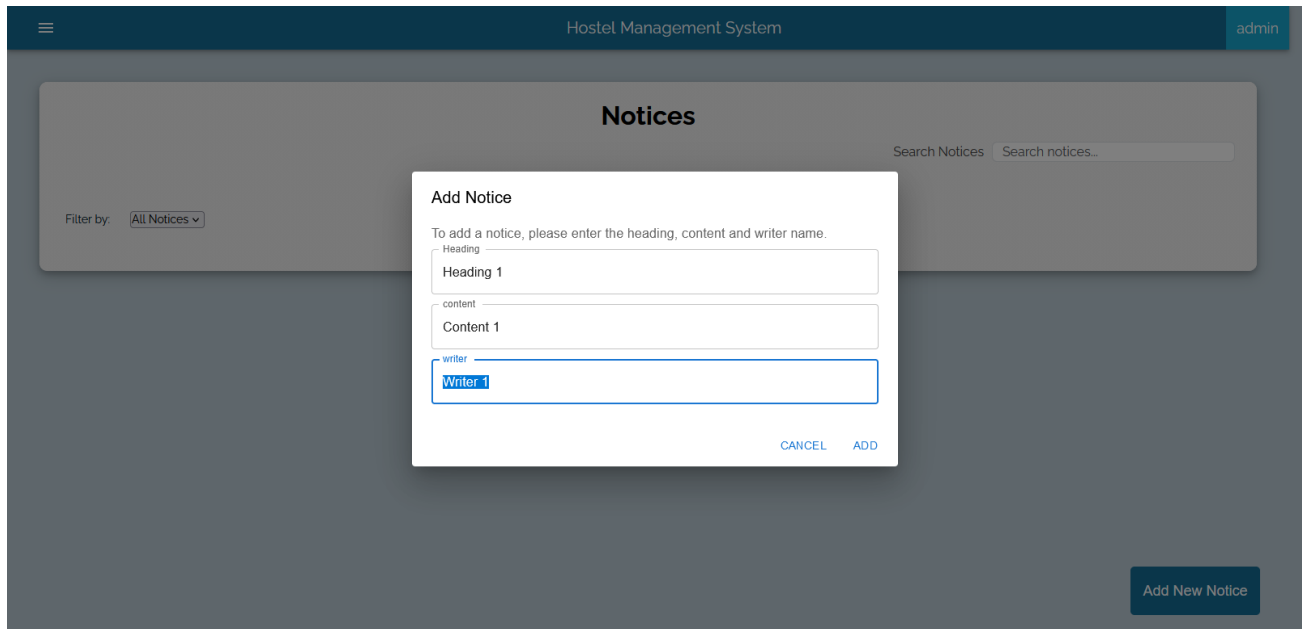

3. Verify the title, message and creator name the user wants to add is added to the respective text fields.
4. Click on the “Add” button.
5. Verify that the notice is added.
6. Verify that multiple notices can be added by a single user.
7. Verify that the number of notices added is correct(no repetition).

Expected Result:

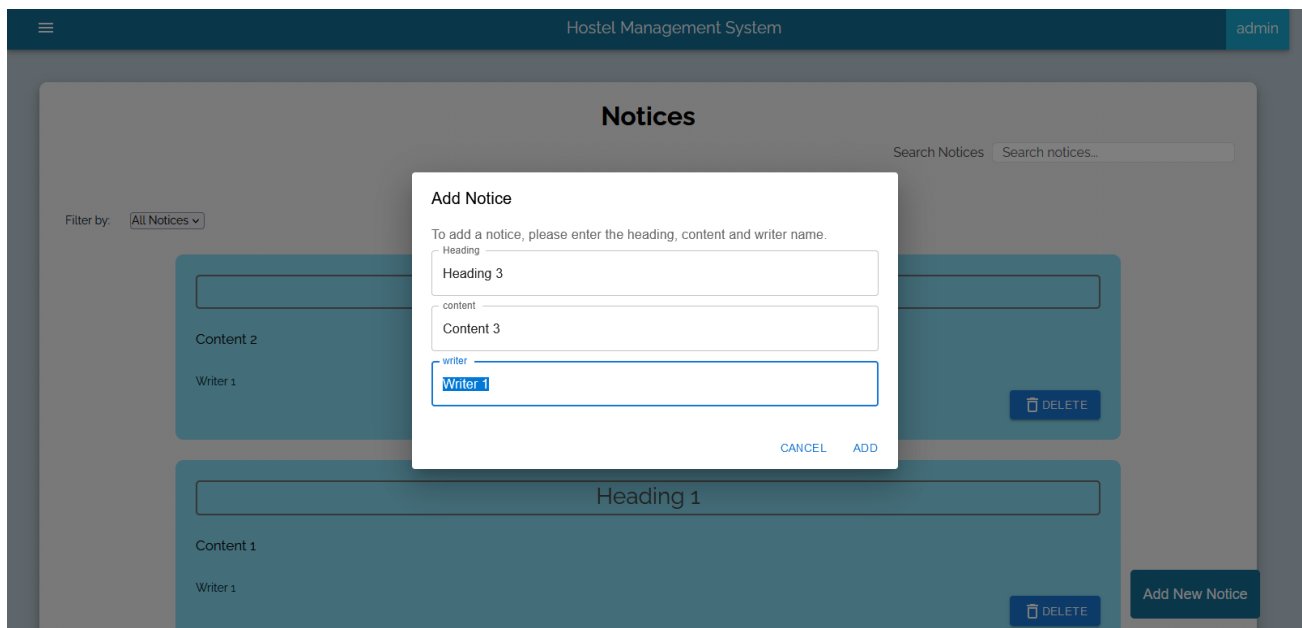

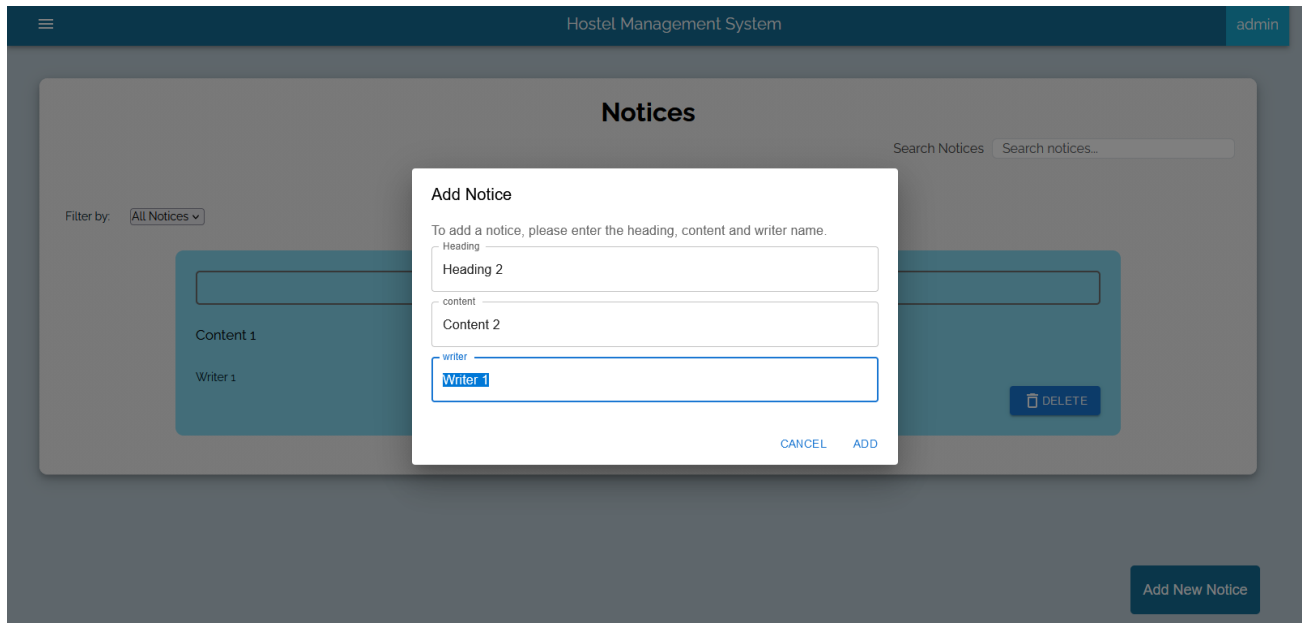

- The user should be able to add notices.
- The notices log should be updated with the new added notice.
- The user should be able to view the new notice in the log.
- The user should also be able to view the notice on the home screen.

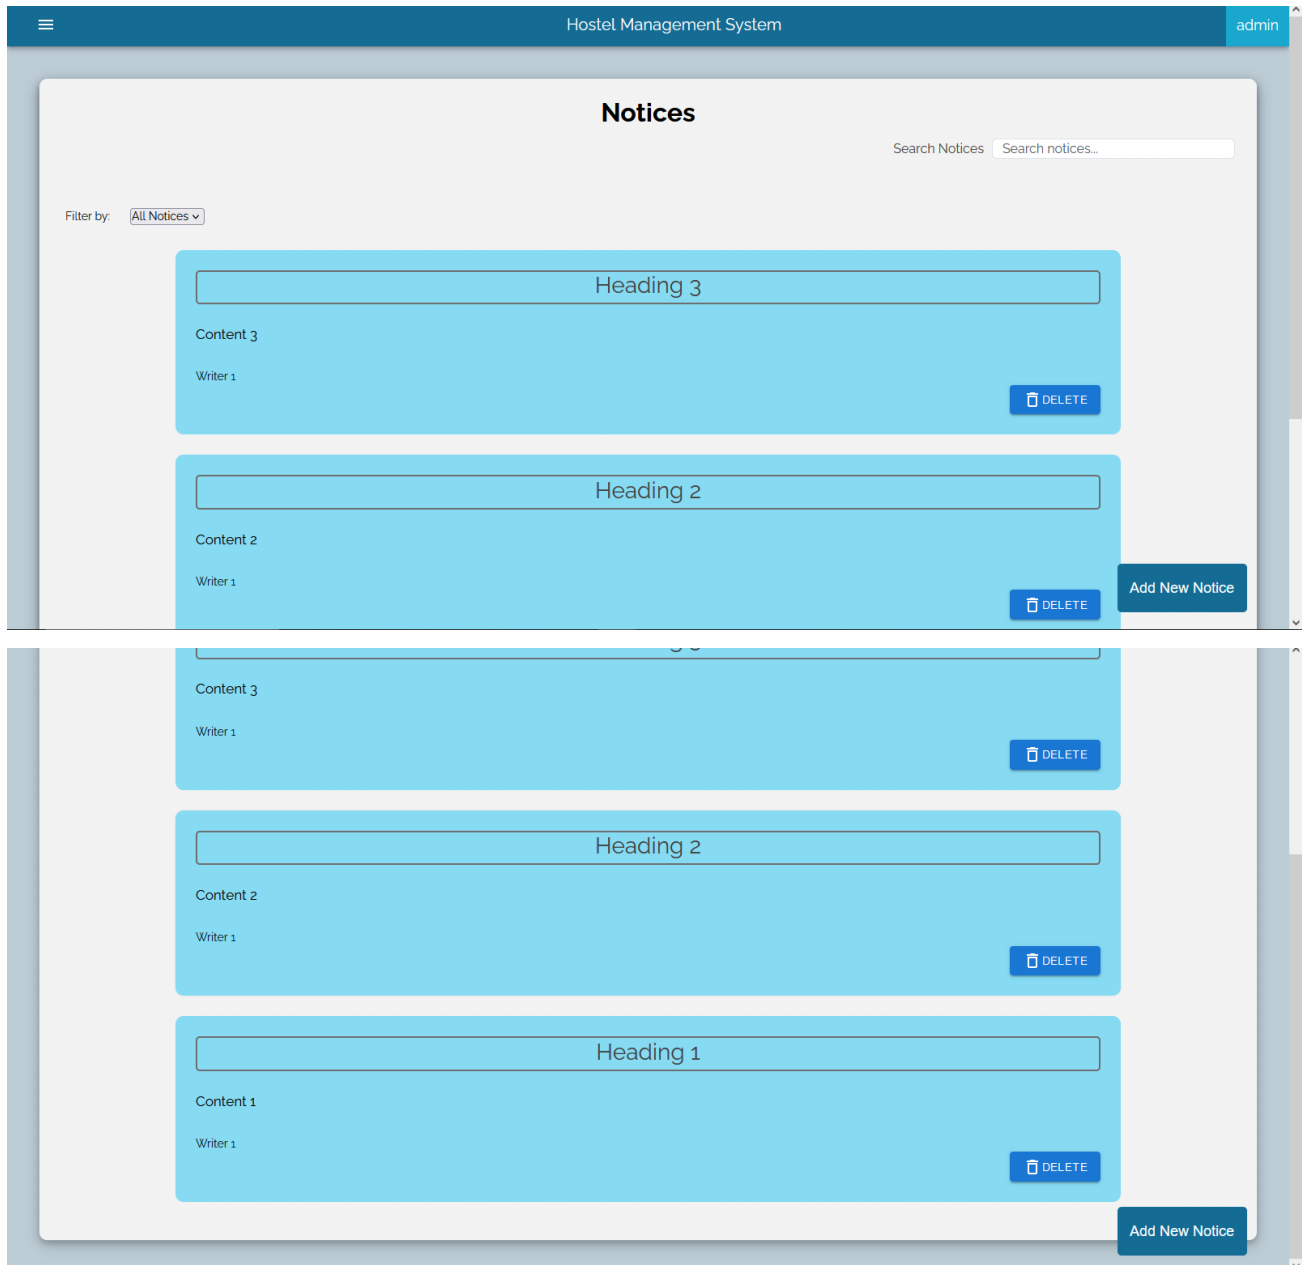

Results:

- Adding first notice from writer 1.

- Adding multiple notices from writer 1.

2. Test Case: Delete Notice

Objective: To verify that the "delete notice" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.
- The user wants to delete a notice.
- The user should have the role as **admin**.

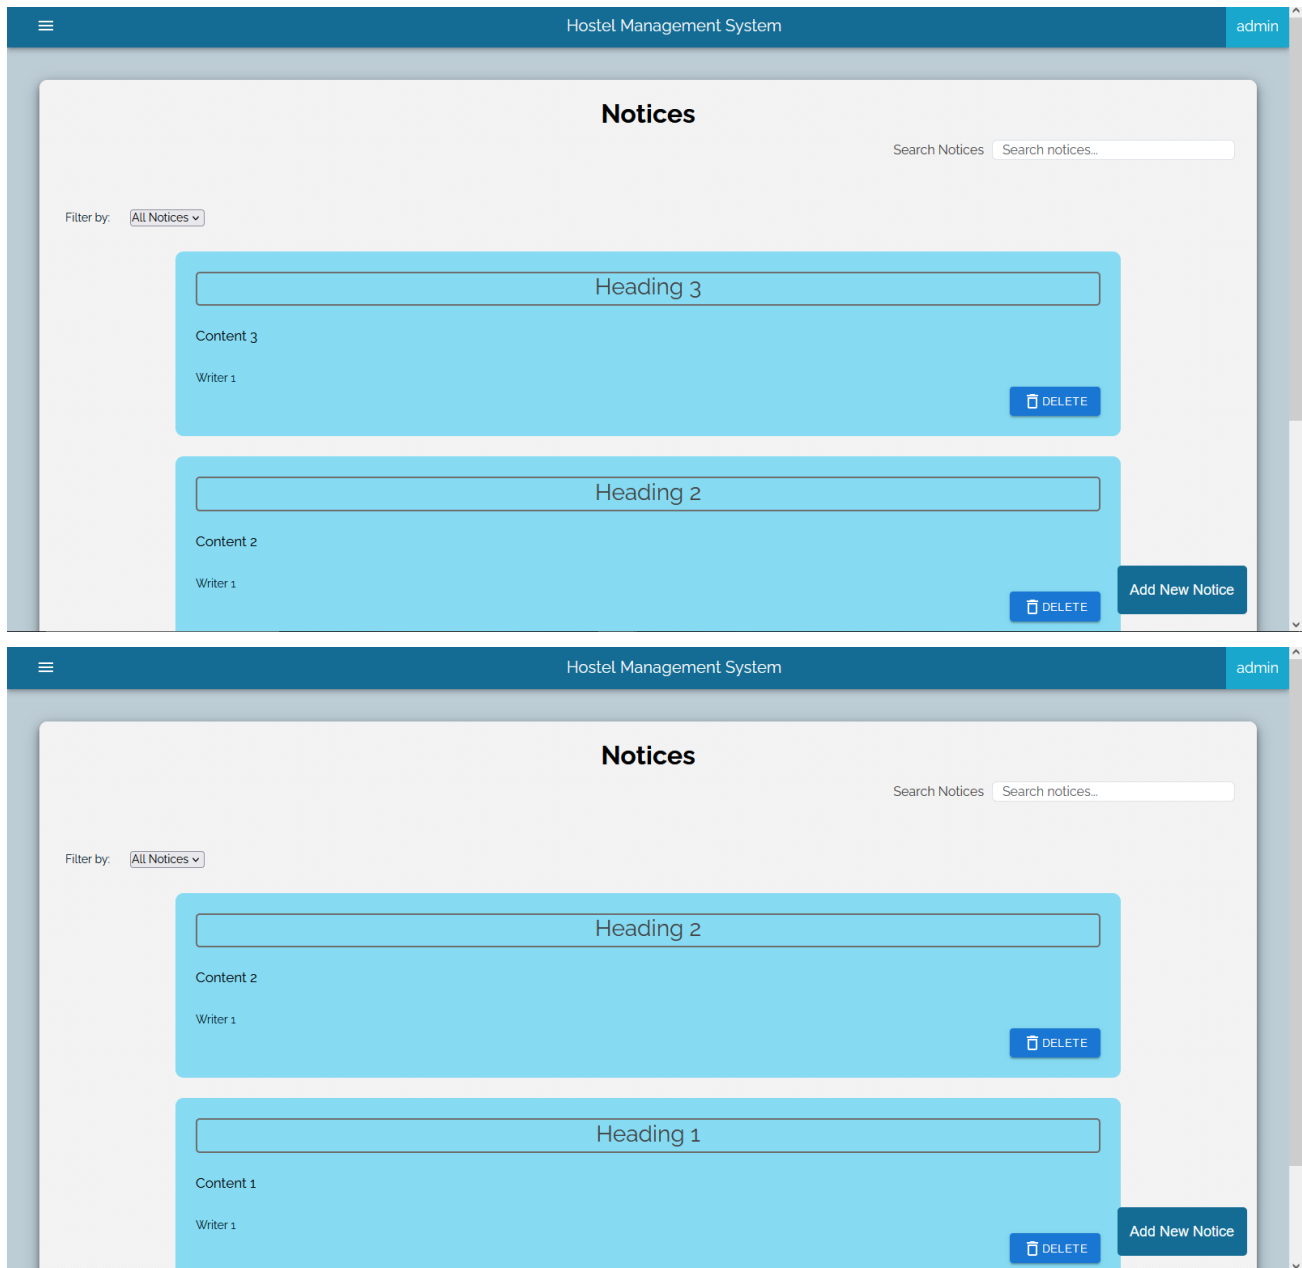

Steps:

1. Navigate to the notices page using the sidebar.
2. Click on the "Delete" button corresponding to the notice the user wants to delete.
3. Verify that the notice is deleted.

Expected Result:

- The user should be able to delete the notice.
- The notices log should be updated with the deletion of notice.
- The user should be able to view the updated notice log.
- The user should also be able to view the updated notice log on the home screen.(if the notice deleted was one of the latest four notices)

Results:

3. Test Case: Filter Notice

Objective: To verify that the "filter notice" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.
- The user wants to read notices from a specific author.

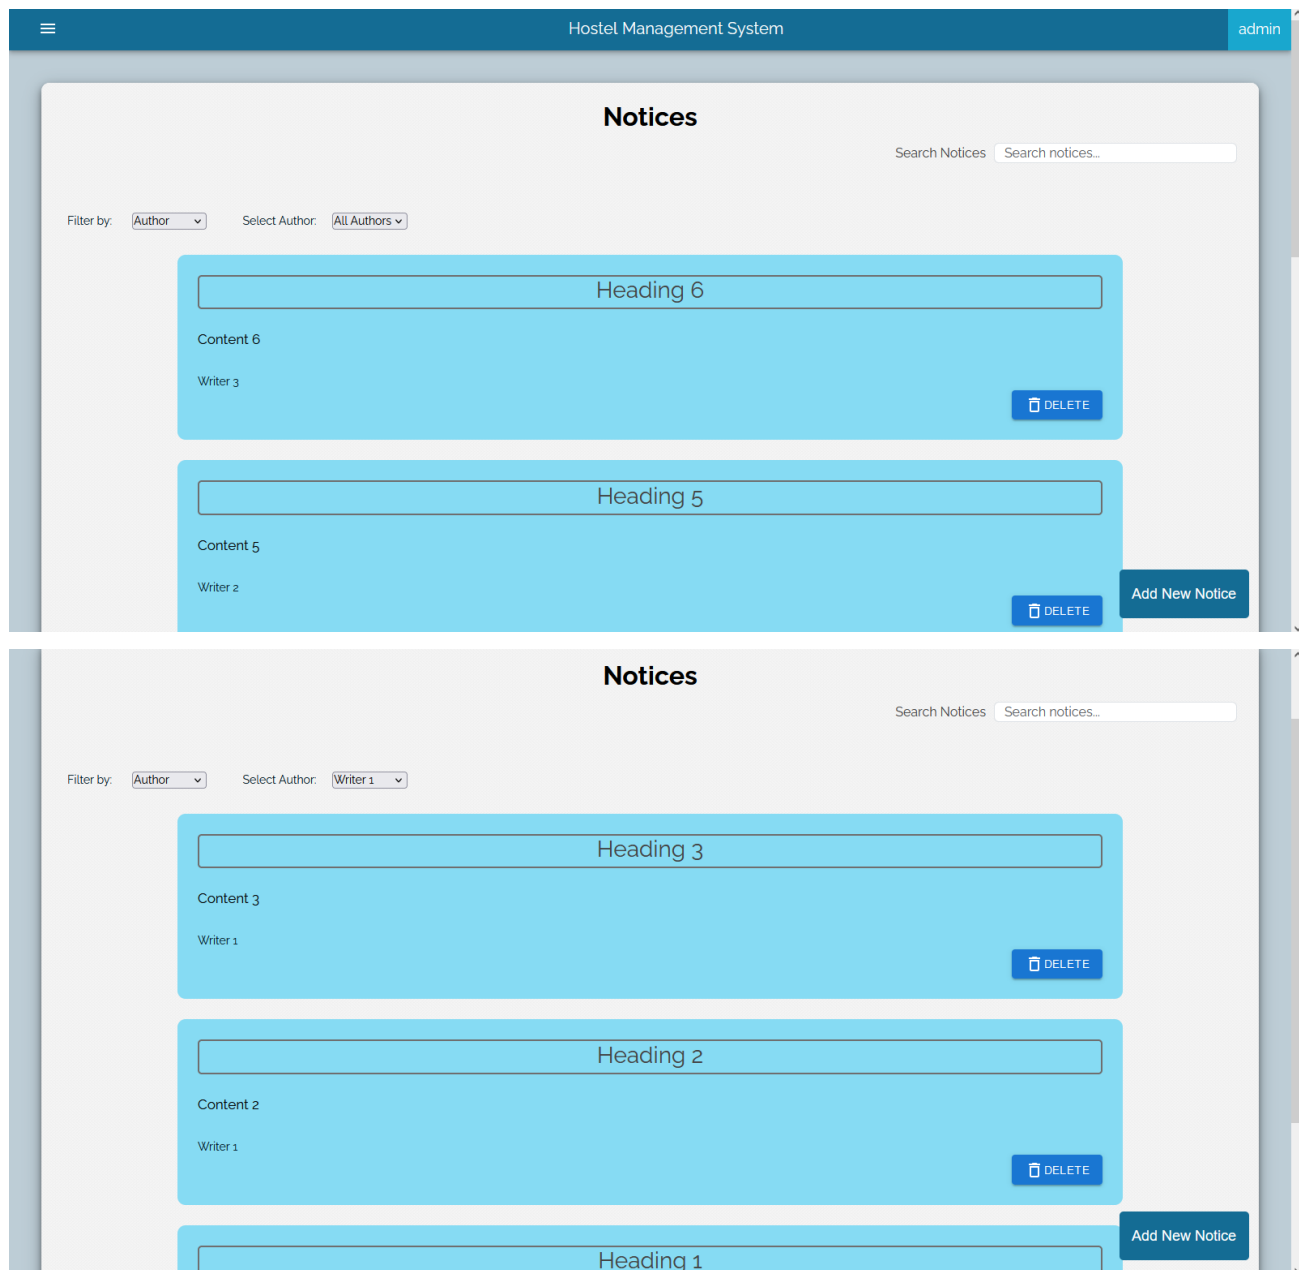

Steps:

1. Navigate to the notices page using the sidebar.
2. Click on the "Filter By" button to select the "Author" option.
3. Select the "Author" from which the user wants to see the notices.
4. Verify whether the notices previewed in the notices log are from the desired author.

Expected Result:

- The user should be able to filter notices.
- The notices log should be updated according to the author selected.

Results:

4. Test Case: Search Notice

Objective: To verify that the "search notice" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.

- The user wants to read notices with a specific heading or content.

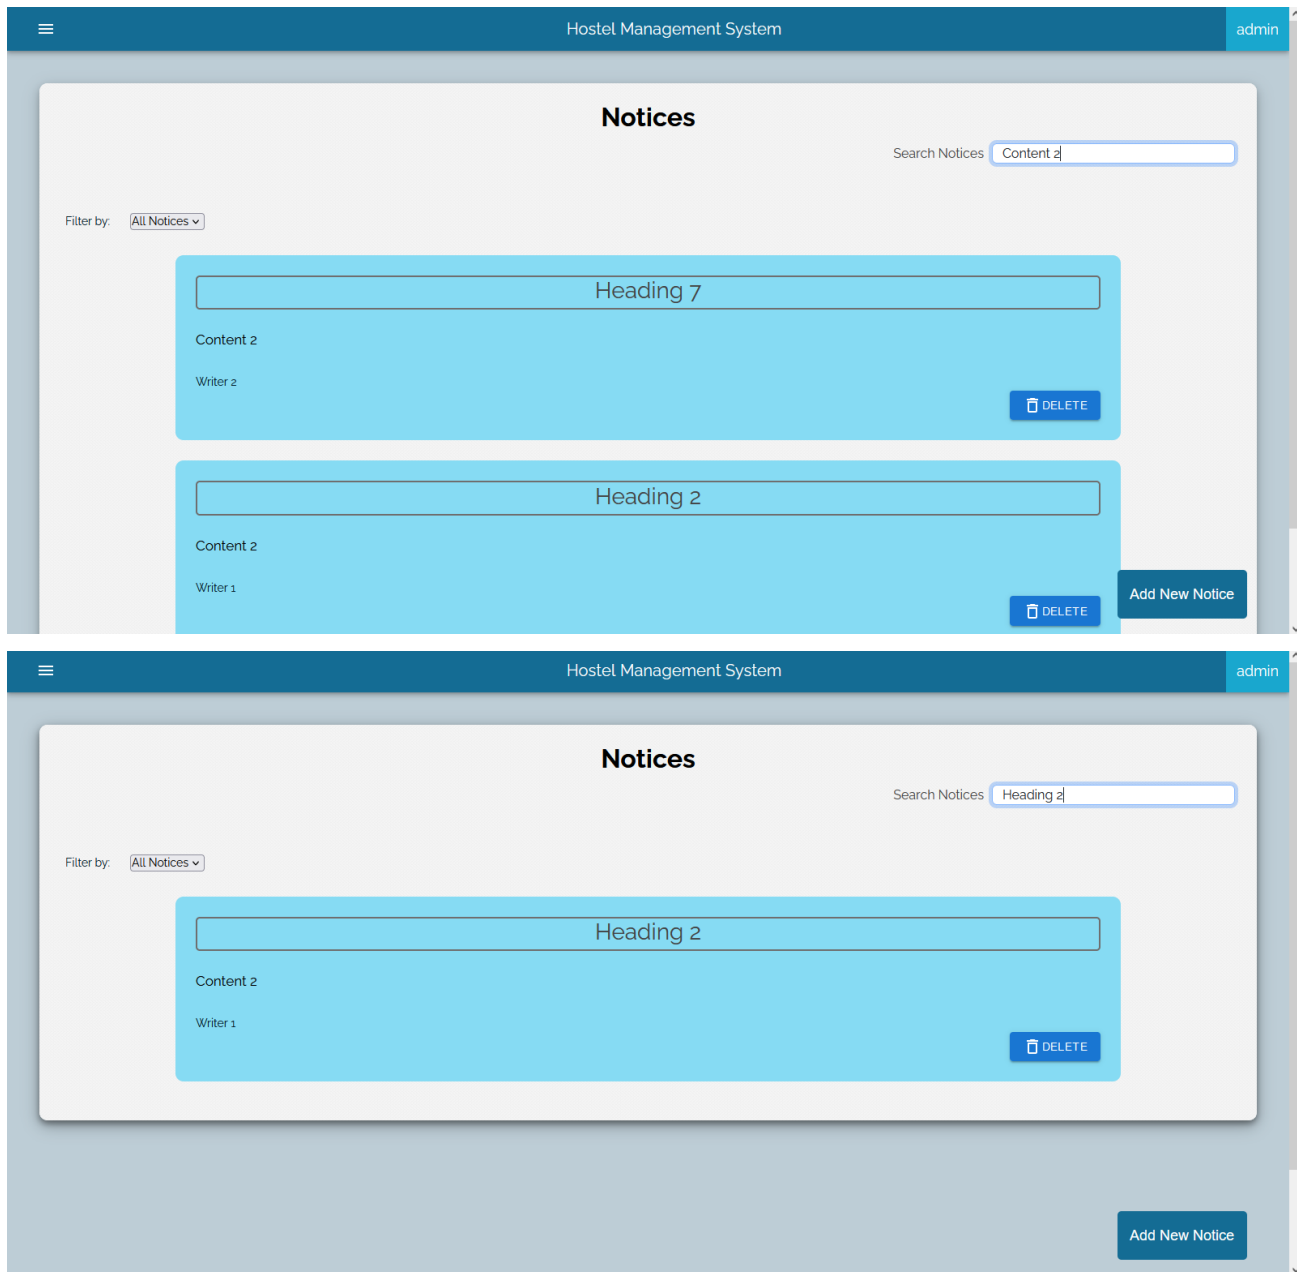

Steps:

1. Navigate to the notices page using the sidebar.
2. Verify the “Heading” or “Content” written in the search bar field.
3. Verify whether the notices previewed in the notices log are of the desired “Heading” or “Content”.

Expected Result:

- The user should be able to search notices.
- The notices log should be updated according to the writing of the “Header” or “Content”.

Results:

5. Test Case: Add Complaint

Objective: To verify that the "add complaint" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.

- The user wants to lodge a complaint.

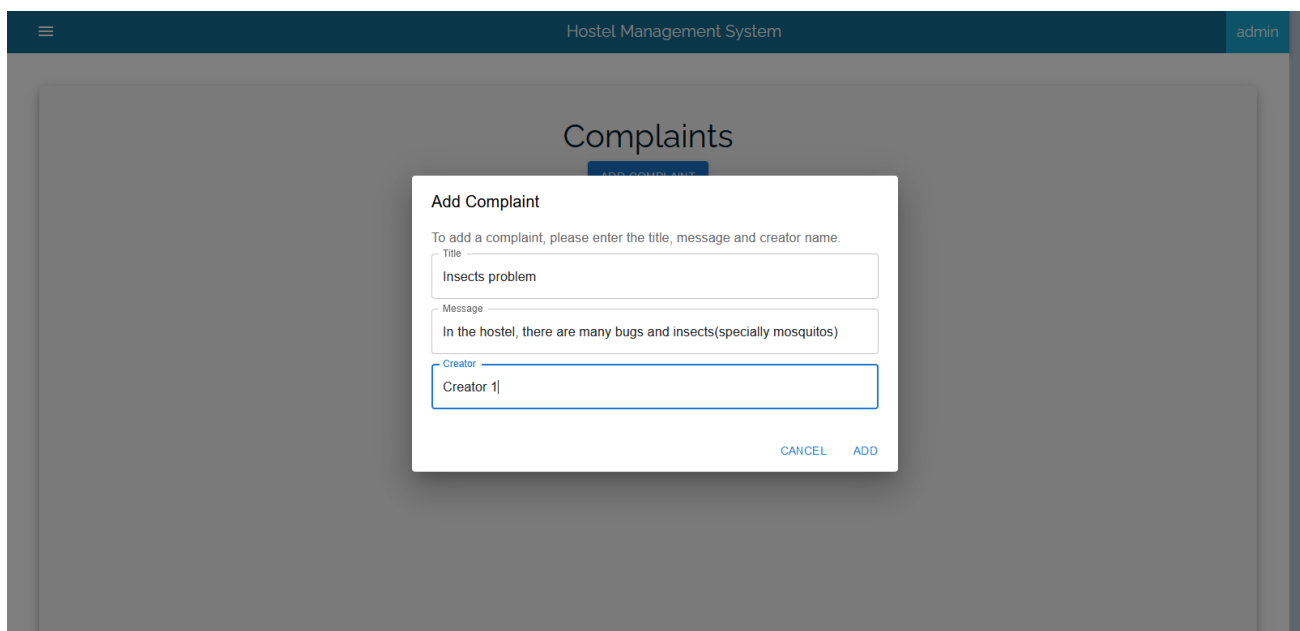

Steps:

1. Navigate to the complaints page using the sidebar.
2. Click on the "Add Complaint" button.
3. Verify the title, message and creator name the user wants to add is added to the respective text fields.
4. Click on the "Add" button
5. Verify that the complaint is added.
6. Repeat steps 1-5 for every role(student and admin).
7. Verify that multiple complaints can be added by a single user.
8. Verify that the number of complaints added is correct(no repetition).

Expected Result:

- The user should be able to add complaints.
- The complaints log should be updated with the new added complaint.
- The user should be able to view the new complaint in the log.

Results:

The screenshot displays the 'Hostel Management System' interface. At the top, there is a dark blue header with a hamburger menu icon on the left, the text 'Hostel Management System' in the center, and the user role 'admin' on the right. The main content area has a light gray background with the title 'Complaints' centered at the top. Below the title, there is a blue button labeled 'ADD COMPLAINT'. A white modal form titled 'Add Complaint' is open in the center. The form contains the instruction 'To add a complaint, please enter the title, message and creator name.' and three text input fields. The 'Title' field contains 'Insects problem', the 'Message' field contains 'In the hostel, there are many bugs and insects(specially mosquitos)', and the 'Creator' field contains 'Creator 1'. At the bottom right of the modal, there are two buttons: 'CANCEL' and 'ADD'.

6. Test Case: Delete Complaint

Objective: To verify that the "delete complaint" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.
- The user wants to delete a complaint.

- The user must have the role as **admin**.

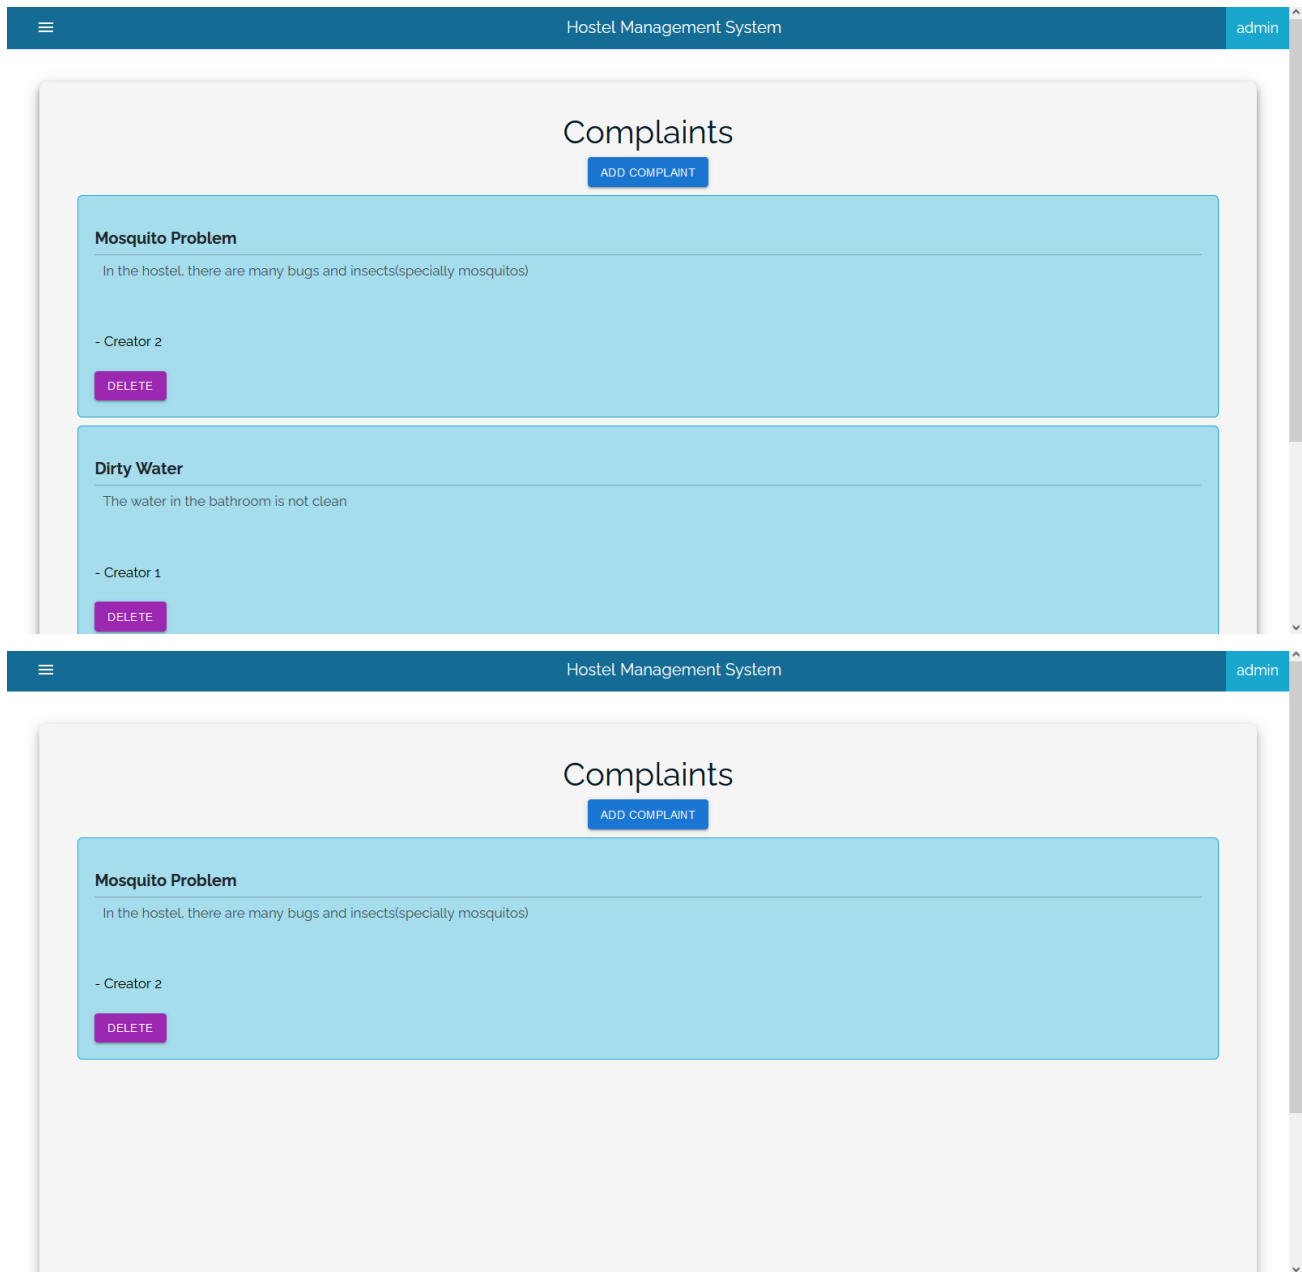

Steps:

1. Navigate to the complaints page using the sidebar.
2. Click on the "Delete" button corresponding to the complaint the user wants to delete.
3. Verify that the complaint is deleted.

Expected Result:

- The user should be able to delete complaints.
- The complaints log should be updated with the deletion of complaints.
- The user should be able to view the updated complaint log.

Results:

7. Test Case: Add Courier

Objective: To verify that the "add courier" functionality of the hostel management website meets the business requirements and functions as intended.

Preconditions:

- The user has a valid account and is logged in to the hostel management website.
- The user wants to add a courier.
- The user should have the role as **admin**.

Steps:

1. Navigate to the couriers page using the sidebar.
2. Verify the title, message and creator name the user wants to add is added to the respective text fields.
3. Click on the “Add” button
4. Verify that the courier is added.
5. Verify that multiple couriers can be added by a single user.
9. Verify that the number of couriers added is correct(no repetition).

Expected Result:

- The user should be able to add courier.
- The couriers log should be updated with the new added courier.
- The user should be able to view the new couriers in the log.
